Investigating the Effects of Science and Political Messages Using Eye Tracking and Experimental Techniques

Contact Person: Dr. Jason Coronel, School of Communication, coronel.4@osu.edu

Research description: Information about the lab can be obtained from our website (http://www.commcogsystems.com/).

Student Participation: The lab welcomes motivated and enthusiastic individuals interested in learning about the research process. We prefer individuals with excellent organizational skills with keen attention to details. Research assistants will learn/gain experience on all of the following: generating experimental stimuli, conducting lab and field experiments, running participants on both eye tracking and behavioral studies, and analyzing data.

Time Commitment: 10-20 hrs/week over 5 months, during the Spring and Summer semesters.

Minimum GPA & Major: A minimum of 3.3 overall GPA. Preference given to students majoring in Psychology, Political Science, Computer Science, Economics, Biology, Data Analytics, Economics, Chemistry, and Anthropology.

Year/ Skill Requirements: First, Second or Third year students.

Compensation: Voluntary experience/ academic credit

To apply: If interested, candidates should send an email (with a resume attached) to coronel.4@osu.edu in order to setup an interview. Applications will be accepted until February 1st, 2018.
