Position/Project Description:
My research study investigates the development of emotional regulation in preschool-age children and the influence of maternal depression and parenting. Students will be involved in one of several possible tasks:
1. Conducting interviews and administering observational tasks to children and mothers
2. Reviewing and assigning codes to video-taped mother-child interactions
3. Screening and processing electrocardiogram (ECG) data

Skills needed:
To be considered as an interviewer/experimenter (#1 task), interpersonal skills are required.

Time Commitment:
Students need to enroll in HDFS 3193 for two semesters and at least 2 credit hours per semester. One credit hour translates to 3 hours of work per week. There is some flexibility with regards to when students complete those hours each week. Beginning summer semester and continuing into autumn.

Major/GPA Requirement:
Minimum 3.3 GPA

To Apply:
Complete an application at http://u.osu.edu/feng.88/opportunities/ by April 23, 2018.
