

STUDENTS IN LIFE SCIENCES ABROAD (STILSA)

INTERNATIONAL RESEARCH INTERNSHIPS (NORWAY AND FRANCE) SPRING 2025

STILSA (Students in Life Sciences Abroad), an educational program based in the department of Molecular Genetics in partnership with [ASC career success](#) offers paid career building opportunities to **OSU degree-seeking undergraduates** at [NTNU](#) (Norwegian University of Science and Technology) in Norway, and [Sorbonne Université](#) in France. Several research-focused internships in the field of systems biology, neuroscience, marine biology, plant biology, RNA biology, terrestrial ecology, biomaterial science and animal ecophysiology are available as full-time independent and individual experiences and will take place in Norway or France. Host laboratories and a general description of the scientific activities (and possible research projects) can be viewed [here](#). Internships last for 90 days (3 months) maximum and must start in the Spring 2025 semester. Students must be enrolled at OSU during the Spring semester. Dates of the internship will be finalized in consultation with the host laboratory in Norway or France for each participant. To apply for the research internship, students should click [here](#) and follow the instructions. The full description of the announcement is [here](#). The deadline for applying is **Nov 13**.

Students can contact Dr. P. Hamel (hamel.16@osu.edu) and J. Brihm-Spann (brihm-spann.1@osu.edu) for further enquiry. Applicants can also contact former STILSA participants (STILSA-TRONDBUSSalumni@osu.edu) if they need information.
